

The establishment of Daylily Garden commenced in the mid 1950's with the planting of the more significant trees, such as Canadian Redwoods, Copper Beech, Pecan, Maple & Liquidambar etc. This then paved the way for mass planting of Daylilies, Camellias and Rhododendrons. Meandering paths take the visitor on a journey of discovery, this tour includes features such as ponds, formal rose garden (with displays of David Austin varieties), hedges, ferns and rolling lawns. Daylily garden is a perfect setting for photographs, picnics, tours or quiet reflection. This garden has been designed for year round enjoyment.
